

# Regionalgruppen - Guide

It's a pleasure to welcome you to our global movement. The ECG is a large and complex organization with members and activists across the world. There are various offices and staff and a whole bunch of volunteers out there working to make our vision become reality.

Our [network of local chapters](#) is the core of our movement. Here citizens, activists, students, politicians and businesses help spread the seeds to make our movement grow.

Below you will find out how to create a local chapter and make it a viable and powerful part of our movement.

You can also watch this [video about how to get involved](#) or this [video about starting a local chapter](#). Or go here to [learn more about the work of the individual local chapters](#) (login required).

## Start a new Local Chapter

How to set up a local chapter in your city?
