Subpages

This page shall help you with all kinds of login issues in the various ECG-tools.

Overview on the account types

We have different types of accounts in the ECG. To reduce confusion see the overview here

ECG-Account	ECG-Service Account	Django Editor Account	SmartWe Account
The most important account for all our active members. It contains • the mail-account first Name.familyName@ecogood.org • as well as access to our tools ◦ Wiki ◦ Nextcloud ◦ Backoffice ◦ Jira ◦ Wordpress websites ◦ Mailing lists ◦ light ◦ ...	The Service account is a functional account for different functions within ECG. Sometimes more than one person share access to this account. This account may only be used to login to Webmail, Datacloud and our mailing list management tool (list.ecogood.org). Please DON'T use it to login into our Wiki or any other tool.	... for our Django-Website-editors to login on web.ecogood.org. The user name is <i>firstName.familyName</i> (like the ECG-Account). However, do not mix them up - the password you set there, is independent from your ECG-Account password	The membership database accounts are also independent from your ECG-Account. Find more on SmartWe - Request access

Login-Problems - general

Attention: with a service Account like [germany@ecogood.org](#) you can not login in tools like wiki or Jira, this type of account will be only accepted for webmail and datacloud!

Case sensitive

Some login dialogs are case sensitive and have to be **lower case** (*vorname.nachname*)
So a login with *Vorname.Nachname* would not work.

User name versus mail address

You need to know that

- *vorname.nachname* is your **user name**
- *vorname.nachname@ecogood.org* is your **mail address**

In most tools you can login only with your user name.
So a login with *vorname.nachname@ecogood.org* would not work.

In some tools both user name **and** mail address are possible.

In few tools you can login only with your mail address.
So a login with *vorname.nachname* would not work.

So if you can not login to a tool with user name, try to login with mail address (and vice versa).

Try to login in another tool

When you have problems logging in to a tool, always try to login

- in another tool
- in the webmail

So lets assume you can not login to the *wiki*, then verify, if you can login to the *datacloud* **and** to *webmail*.

If both is possible, then probably the wrong password is used.

If only webmail is possible, then try a password reset ([Choosing a new password - The password reset process](#))

Make my browser stored password visible

Your Browser shows you these black bullets, but you are not sure, if this is the correct password?

If for some reason your login already shows some dots for a password, **before** you started typing, then most probably your browser has stored it.
If you want to see this password in clear text, you can right click it and open the HTML view:

```
<!-- Header -->
<div id="header">...</div>
<!-- END Header -->
<!-- Content -->
<div id="content" class="colM">
  <div id="content-main">
    <form action="/de/admin/login/?next=/de/admin/auth/user/" method="post" id="login">
      <input type="hidden" name="csrfmiddlewaretoken" value="TT36zMuEivLjgieRnJm2s3">
      <div class="form-row">...</div>
      <div class="form-row">
        ::before
        <label class="required" for="id_password">Passwort</label>
        <input type="password" name="password" required id="id_password"> == $0
        <input type="hidden" name="next" value="/de/admin/auth/user/">
        ::after
      </div>
      <div class="submit-row">...</div>
    </form>
    <br class="clear">
  </div>
<!-- END Content -->
```

html	body.django-admin-style.login	div#container	div#content.colM	div#content-main	form#login	
Stile	Berechnet	Layout	Ereignis-Listener	DOM-Umschaltpunkte	Eigenschaften	Zugänglichkeit
Filtern						
element.style {						
}						
body.login.django-admin-style #container #content #content-main .form-row #id_password, {						
background-color: #fff;						
margin-top: 0!important;						
}						
body.login.django-admin-style #container #content #content-main .form-row input {						
background-color: #fff;						
margin-top: 0!important;						
}						

Once you replace here the "type" from "password" to any other value (or completely remove it), the password is displayed:

Django-Verwaltung

BENUTZERNAME:

PASSWORT:

```

<div id="header">...</div>
<!-- END Header -->
<!-- Content -->
<div id="content" class="colM">
  <div id="content-main">
    <form action="/de/admin/login/?next=/de/e
      <input type="hidden" name="csrfmiddlewa
        <div class="form-row">...</div>
        <div class="form-row">
          ::before
          <label class="required" for="id_passw
            <input type="xxx" name="password" req
            <input type="hidden" name="next" valu
          ::after
        </div>

```

Don't worry:
This is only visible, as long you have this page open. When you reload it, it is invisible again.

Login-Problems in E-Mail-System

In webmail (roundcube)

ANMELDEN

ECG Webmail • [Support](#)

Problems in <https://webmail.ecogood.org/> may have various causes:

Problem: Passwort expired

Some mail accounts require (for security reasons) to set a new password after some months.
See details in [Choosing a new password - The password reset process](#)

Problem: Login is not possible

ANMELDEN

ECG Webmail • [Support](#)

- You are sure that you entered the correct password, but it is not accepted?
Refer to [IT Support - what is the purpose of ECG IT services?](#)
- Password forgotten?
do a reset under [Passwort des GWÖ-Account erneuern \("Reset"\)](#)
- You are not yet registered?
Go here: [Apply for an ECG Account](#)

In a local Mail-Client

In a local Mail-Client (like Thunderbird, Outlook ...) these issues can occur:

Problem:

Login is not possible

If you can not login,
try to login via webmail (see above)

Problem: Occasionally a Password-Dialog pops up

(Can look different per Mail-Client and type of problem)

Normally the reason is, that a service account's password is expired.
In this case see [Passwort des GWÖ-Account erneuern \("Reset"\)](#).

Login Problems in Wiki

Problem: I can not login

- Enter only **vorname.nachname**:

Benutzername michael.dollinger

Passwort ●●●●●●●●

☐ Meinen Login an diesem Computer speichern

Anmelden

... **do not** enter the Domain [@ecogood.org](#):

Benutzername michael.dollinger@ecogood.org

Passwort ●●●●●●●●

☐ Meinen Login an diesem Computer speichern

Anmelden

- Try to login to your e-mail (as it is using the same account)

Login-Problems for mailing lists

The former System "Sympa" doesn't exist anymore. That's the reason why you cannot login anymore into that system.

As a replacement there exists a webbased management tool (mlmmj-light-web-ecg) for the new mailing list system (mlmmj).

<https://list.ecogood.org> uses same login credentials - username and password of ECG-Accounts - as for other IT services (like: mail, datacloud, wiki, ...).

However, we repetetly have cases where users report login-problems specifically on <https://list.ecogood.org>, whereas they do not have any login-problems for all other IT services (like: mail, datacloud, wiki, ...).

This might be related to the lenght of the password or usage of special characters within the password (like 'ß' or german Umlaute 'ä, ö, ü') which are handled differently by <https://list.ecogood.org> and lead to failed login attempts.

If this is the case try shortening and/or changing your ECG-Account password, to see if this solves your login-problems at <https://list.ecogood.org>.

A corresponding COREIT-ticket exists ([COREIT-551](#) - Getting issue details...) and is being worked on.

STATUS

Login-Problems in Datacloud

As Chuck Norris is the gate keeper of the Datacloud you wont run into any trouble here! 😊

The screenshot shows the CAS login interface for ECG Datacloud. At the top, there is a dark blue header with the 'CAS' logo. Below this, a light blue banner displays the 'ecgcloud' logo and 'ECG Datacloud' text. The main content area has a heading 'Please enter your username and password from your ECG account' with a lock icon. It contains two input fields: 'Username (without @ecogood.org):' and 'Password:'. A dark blue 'LOGIN' button is positioned below the password field. To the right of the password field is a dark blue button with a white eye icon. At the bottom, there is a link for 'Forgot your password?' and a security notice: 'For security reasons, please log out and exit your web browser when you are done accessing services that require authentication!'.
